Great work! You may move on to the final module to work on the edible safety plans. You have made it to the top of the Pyramid of Edibles Safety.

Pyramid of Edible Safety

* Some state codes require cannabis edible manufacturers to follow HACCP. FDA's 21 CFR 117 Preventative Controls for Human Food Rule goes beyond HACCP to include Allergens, Sanitation, Supply Chain, and a Recall Plan. In building the Pyramid of Edible Safety, HACCP builds from GMPs and Prerequisite programs. Copyright © 2020. ImEPIK,LLC. All Rights Reserved.
